TECHNICAL DATA SHEET

Chemical Name: Tris(2-chloroisopropyl)phosphate
 Molecular Formula: $C_9H_{18}Cl_3O_4P$
 Product appearance: Colorless or light yellow transparent liquid
 CAS No.: 13674-84-5

● Technical Index:

No.	Standards	Index
1	Moisture (H ₂ O), % ≤	0.1
2	Acid value, mg (KOH)/g ≤	0.1
3	Viscosity(25 °C)mPa·s	67-72
4	Density (20-25 °C), g/ml	1.288-1.297
5	Color APHA ≤	50

● Applications & Features:

TCP (Tris(2-chloroisopropyl)phosphate) is a widely-used flame retardant chemical added to a variety of products like polyurethane foams, textiles, and plastics to improve their fire resistance. It is often used as a replacement for older flame retardants that raised environmental and health concerns. TCP functions by slowing the spread of flames and making materials more difficult to ignite.

● Storage & Packages

Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source. 250kg/drum net each, 1,000kg square IBC package.
